OBJECTIVE:

Seasoned Full Stack Web Developer offering over 10 years of diverse IT experience and a proven track record in modern web development. Driven by a passion for technological innovation and excellence, I am seeking a dynamic developer role where I can leverage my expertise in front-end and back-end technologies, along with my leadership and collaborative abilities, to contribute to impactful projects and drive advancements in usercentric software solutions.

EXPERIENCE

INDEPENDENT FULL STACK WEB DEVELOPER · SEATTLE, WA   2021-2024

- Developed dynamic web applications primarily using React, showcasing strong front-end development skills.
- Gained experience with Ruby on Rails and C++ through personal projects and continuous learning.
- Focused on writing extensible, maintainable, and scalable code, ensuring high-quality standards are met.
- Collaborated closely with various teams to develop and deliver projects, demonstrating an ability to work effectively in a team environment.
- Implemented containerization solutions with Docker, optimizing application deployment and scalability.
- Selected as Project Leader in both key group projects during my bootcamp training, demonstrating effective leadership and team collaboration skills.

Projects:
- Portfolio Website: Showcased full-stack development skills, performance optimization, and TypeScript proficiency in creating my professional portfolio, demonstrating organized and efficient coding practices.
- PiHole Pause: Developed a React-based full-stack web application for managing multiple PiHole instances, highlighting expertise in front-end development with React and effective backend integration using Next.js, tailored for optimal perfomance and user experience.
- Spectral: A privacy-focused, self-hosted messaging application, showcasing skills in full-stack development and secure application design.

SR TECHNOLOGY SUPPORT SPECIALIST · WHOLE FOODS MARKET · SEATTLE, WA   2017-2023

- Collaborated with diverse teams, providing technology solutions and support, reflecting strong teamworking and communication skills
- Automated routine tasks using PowerShell, demonstrating coding skills and efficiency in problemsolving.
- Managed and optimized Active Directory and Group Policy, showcasing skills in system administration and attention to detail.
- Developed and utilized ServiceNow dashboards and reports, displaying an aptitude for data analysis and IT operations monitoring.
- Led hardware maintenance and IT projects, ensuring timely delivery and optimal system performance.
- Provided comprehensive end-user support, ensuring excellent technical experiences and demonstrating customer-focused problem-solving.

EDUCATION

UNIVERSITY OF OREGON · SEATTLE, WA   2022-2023

- Full Stack Coding Bootcamp
